Zaheer Abdul

Java Full Stack Developer

347-213-3636
Zaheer.abdul3636@gmail.com

To leverage my 7+ years of experience as a Java Full Stack Developer to contribute my expertise, creativity, and problem-solving skills to a dynamic team and cutting-edge projects. My goal is to help build robust, scalable, and user-friendly web applications that meet the evolving needs of clients and end-users.

Professional Summary

- Experienced **Java Full Stack Developer** with expertise in **Java**, **Spring Boot**, **Microservices**, **Angular**, and **REST API** development across enterprise-grade applications.
- Proven ability in **cloud-native development** using **Azure**, **Kubernetes**, **Docker**, and **CI/CD pipelines** with **Azure DevOps**.
- Hands-on experience in **data migration**, **code upgrades**, and **API integration** using technologies like **MongoDB**, **SQL Server**, **CosmosDB**, and **PostgreSQL**.
- Skilled in both **frontend (Angular, HTML5, CSS3)** and **backend (Java, Spring, Maven)** technologies, delivering user-centric and scalable applications.
- Adept at **DevOps practices**, including containerization, CI/CD orchestration, and monitoring using **Postman**, **GitHub Copilot**, and **K8s**.
- Experience in **healthcare domain projects** including modules like **App Registration**, **Privacy and Consent**, and **Security Label**.
- Strong communication and team collaboration skills gained through active participation in **Agile ceremonies**, **KT sessions**, **retrospectives**, and **DR reviews**.
- Proficient in **debugging**, **bug fixing**, and **production support (ERT)** in cross-functional and distributed environments.
- Expertise in building and managing microservices architectures with **Spring Cloud**, **OAuth**, and **JWT-based** security models.
- Delivered scalable solutions following **design patterns**, **best coding practices**, and **peer-reviewed standards**.
- Able to effectively balance multiple priorities, lead initiatives, and contribute to product strategy and release planning.
- Deep understanding of **container orchestration** using **Kubernetes**, deployment validations in **QA**, **PAT**, and **UAT** environments.
- Capable of **mentoring junior developers**, conducting code reviews, and enforcing clean code principles and test coverage standards.
- Familiar with **monitoring tools**, **ERT workflows**, and **CSV documentation** for FDA-regulated healthcare environments.
- Flexible, proactive, and committed to continuous learning and adopting emerging technologies.

Technical Skills

Programming Languages: Java, JavaScript, TypeScript, Python, Ruby, SQL, PL/SQL
Frontend Frameworks: Angular 8+, Angular 12, AngularJS, React.js
Backend Frameworks & Technologies: Java 8+, Spring Boot, Spring Batch, Spring Cloud, Node.js, Maven, Hibernate, JPA, Kafka, RabbitMQ
Cloud & DevOps: Azure, AWS (S3, Lambda, EC2, CloudFront, CloudFormation, CDK), Docker, Kubernetes, GitHub Actions, GitLab CI/CD, Jenkins, Azure DevOps
API Development & Integration: RESTful APIs, SOAP, GraphQL, XML APIs, JWT, OAuth, Spring Boot, Spring MVC, Express.js
Infrastructure & IaC: Terraform, CloudFormation, CDK, Containerization, CI/CD Pipeline Automation
UI/UX Development: HTML5, CSS3, SASS, LESS, jQuery, AJAX, Web Animations, Bootstrap, Material Design
Frontend Architecture: MonoRepo, Micro Frontends, Component-Based UI Design, Responsive Web Design

Performance Optimization: Asynchronous Programming, Caching (Redis, Memcached), Code Splitting, Lazy Loading
Databases & Storage: SQL Server, Oracle, PostgreSQL, MongoDB, CosmosDB, Redis, Memcached, AtlasDB, Aerospike
Software Development Principles: OOP, Design Patterns, SOLID Principles, TDD, BDD, Secure Coding, Code Reviews
Testing & Debugging: Jest, Cypress, Mocha, Jasmine, JUnit, Mockito, Postman, Selenium, Integration Testing, Unit Testing
Monitoring & Logging: Splunk, Dynatrace, CloudWatch, Logging Pipelines, SonarLint
Version Control & CI/CD: Git, GitHub, GitLab, Bitbucket, Maven, Jenkins, GitHub Copilot
Collaboration & Agile: Agile, Scrum, Sprint Planning, Retrospectives, KT Sessions, Cross-Functional Teams, Stakeholder Communication

---

Education

Masters in Computer Science from University of Maryland - Baltimore County

---

Professional Experience

Java Full Stack Developer

Cognizant (Trizetto Healthcare Client), Remote
Jun 2025 – Present

- Led **full stack development** across backend (**Java**, **Spring Boot**, **Maven**, **Microservices**) and frontend (**Angular**) for multiple healthcare applications.
- Developed and maintained **RESTful APIs** for modules like **Privacy & Consent**, **Security Label**, and **App Registration**, ensuring scalable and secure data workflows.
- Performed **Java upgrades**, **code migration**, and **data ingestion** for legacy systems transitioning to modern microservice architectures.
- Integrated databases including **SQL Server**, **MongoDB**, **CosmosDB**, and **AtlasDB**, optimizing queries and data models for performance.
- Deployed and validated services across **QA**, **PAT**, and staging environments using **Putty**, **WinSCP**, and custom deployment pipelines.
- Participated in **DR reviews**, **CSV design**, **retrospectives**, **KT sessions**, **wall walks**, and Agile **daily stand-ups** to align with product goals.
- Created and validated **CSV design documents**, release plans, and test data to support **ERT tickets**, production issues, and post-deployment checks.
- Built and maintained CI/CD pipelines using **Azure DevOps**, incorporating **Kubernetes**, **Docker**, **Postman**, and **GitHub Copilot**.
- Actively resolved production **ERT support bugs** and contributed fixes in compliance with Trizetto's coding standards and privacy policies.
- Ensured seamless UI/UX across web modules using **Angular**, **HTML5**, **CSS3**, and responsive layout techniques.
- Worked in close collaboration with cross-functional teams including architects, QA, and product owners to ensure sprint delivery targets.
- Participated in **Sprint Grooming**, **Feature Planning**, and **Backlog Refinement** to prioritize business-critical modules and enhancements.
- Developed robust **test cases** for backend APIs and UI components, improving overall defect prevention and release confidence.
- Conducted peer code reviews and mentored junior developers on **clean code**, **unit testing**, and **component reusability**.
  Delivered high-quality, production-ready features in a **cloud-native** environment with **Azure Kubernetes Services (AKS)**.

Tools used: Java, Spring Boot, Angular, Maven, Azure, Azure DevOps, CosmosDB, MongoDB, SQL Server, Kubernetes, Docker, Postman, GitHub Copilot, Putty, WinSCP

Java Full Stack Developer

New York Life Insurance Company, Bethesda, Maryland
Oct 2023 – May 2025

- Built robust enterprise apps using **Java**, **Spring Boot**, and **RESTful APIs** supporting insurance workflows and claims data ingestion.
- Developed responsive UIs with **Angular** and **TypeScript**, adhering to accessibility and usability standards.
- Automated CI/CD using **GitHub Actions** and maintained Docker-based build pipelines.
- Integrated **Oracle SQL** for backend processing and batch operations across claims modules.
- Managed containerized deployments with **Kubernetes**, improving scalability and reducing manual errors.
- Delivered enhancements to legacy SOAP services by modernizing with **REST APIs** and JWT-based auth.
- Participated in Agile ceremonies, product grooming, and retrospectives to align with sprint goals.
- Performed production support and hotfix resolution for priority defects and change requests.
- Mentored junior developers and reviewed PRs to enforce clean code and performance optimization.
- Coordinated across multiple teams to ensure cross-platform integration with external vendor APIs.
- Led system upgrades aligning with secure coding and cloud deployment principles.
- Managed backend-to-frontend contracts and JSON transformation using Spring annotations.
- Delivered microservice-based solutions for financial data aggregation and reporting.
- Implemented CI best practices using **GitHub**, **Jenkins**, and **SonarLint**.
- Contributed to database schema changes and SQL tuning tasks for high-traffic modules.

Tools used: Java, Spring Boot, Angular, GitHub Actions, Jenkins, Oracle SQL, Kubernetes, Docker, Postman

---

Java Full Stack Developer

Marriott International, Bethesda, Maryland
Nov 2022 – Sep 2023

- Developed **Java** microservices using **Spring Boot**, integrating with **MongoDB** and **Kafka** for asynchronous messaging.
- Built scalable frontend interfaces using **React**, ensuring pixel-perfect rendering and API contract integration.
- Managed deployments with **Docker**, maintaining build pipelines and automated test executions.
- Worked on enhancements for guest profile and booking APIs, integrating with 3rd-party partners.
- Maintained CI/CD jobs on **Azure Pipelines**, including test coverage validation.
- Ensured GDPR and PCI compliance by implementing proper access controls and audit logging.
- Participated in product grooming, backlog refinement, and sprint delivery coordination.
- Authored comprehensive documentation for internal tools and external vendor APIs.
- Refactored code for better maintainability and testability, reducing tech debt.
- Enhanced UI accessibility using semantic HTML and ARIA roles.
- Improved system observability with custom logging pipelines and monitoring hooks.
- Wrote integration tests using **JUnit**, **Mockito**, and **Cypress**.
- Tuned MongoDB queries to enhance performance in analytics modules.
- Applied OAuth2.0 to secure customer identity services.
- Worked closely with QA and product teams to ensure functional and UX completeness.

Tools used: Java, Spring Boot, React, MongoDB, Azure DevOps, Docker, JUnit, Mockito, OAuth2.0

Java Full Stack Developer

Accenture (Walmart Client), Bangalore, India
Sep 2021 – Jun 2022

- Delivered scalable APIs and business services using **Spring Boot**, **Hibernate**, and **MySQL**.
- Built and deployed Angular components for product listing and checkout flows.
- Integrated Walmart payment gateways and loyalty systems into backend.
- Participated in sprint demos and feature showcase to business stakeholders.
- Implemented logging and alerting hooks using ELK stack for order pipeline.
- Tuned queries and performed schema refactoring for inventory and pricing systems.
- Migrated legacy monolith services to modular microservices with Docker.
- Maintained CI/CD via GitLab Pipelines and artifact repositories.
- Refactored codebase for compliance with Walmart's security review process.
- Led a 3-member team for implementing coupon redemption module.
- Developed utility scripts for database seeding and cleanup in QA.
- Mentored new team members on RESTful best practices.
- Documented API contracts in Swagger/OpenAPI specs.
- Collaborated with product and test teams during UAT cycles.
- Participated in hotfix planning during major retail events.

Tools used: Java, Spring Boot, Angular, MySQL, GitLab, Docker, Swagger

---

Java Developer

UST, Bangalore, India
Mar 2018 – Aug 2021

- Developed backend services using **Java**, **Spring**, and **Oracle DB** for banking clients.
- Maintained SOAP and REST APIs for core banking operations.
- Participated in code refactoring, schema design, and performance testing.
- Authored unit tests using **JUnit** and **Mockito** for regression validation.
- Built UI forms using **JSP**, **HTML**, and **JavaScript**.
- Collaborated with BAs for requirement gathering and impact analysis.
- Migrated legacy EJB modules to Spring Boot-based REST services.
- Created Jenkins jobs for nightly builds and automated testing.
- Designed stored procedures for batch reconciliation tasks.
- Handled production deployments and post-release validations.
- Supported QA during test cycles and fixed blocker bugs.
- Conducted KT sessions for cross-team onboarding.
- Documented application flow and onboarding guides for support teams.
- Developed data extraction scripts for regulatory reports.
- Participated in ISO compliance checklist implementation.

Tools used: Java, Spring, Oracle DB, JSP, HTML, Jenkins, JUnit, EJB
